

TÂNIA OLIVEIRA

Junior Software Developer | Frontend | APIs | Integrations | Business Systems

Setúbal, Portugal • +351 935 582 635 • taniaelizaoliveira@gmail.com • linkedin.com/in/oliveira-tania • github.com/TaniaElizaOliveira

PROFESSIONAL PROFILE

Final-year Software Engineering student and Junior Software Developer with practical experience in web development, responsive interfaces, API integration, business systems, e-commerce, backoffice and internal applications. I have worked with React, Vite, JavaScript, TypeScript, HTML, CSS, REST APIs, Sage 50c, WooCommerce, C#/.NET, MongoDB, MySQL, GitHub, Render and Vercel. I like to understand the problem before the solution: who will use it, what data comes in, which API responds, where errors may happen and how the solution can be maintained afterwards.

TECHNICAL SKILLS

Frontend

React, Vite, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Sass, responsive interfaces, componentization and basic UI/UX.

Backend & Integration

REST APIs, C#/.NET, Node.js, PHP, Laravel, Sage 50c, WooCommerce, CRM, system integration and data synchronization.

Databases

MongoDB, MySQL, MariaDB, SQLite.

Workflow & Delivery

Git, GitHub, Bitbucket, Render, Vercel, Postman, Kanban, build validation, technical documentation and error analysis.

PROFESSIONAL EXPERIENCE

Software Developer / Frontend & Integrations

IT.POWERON — May 2025 to present | Portugal

- Development and maintenance of web applications with React, Vite, JavaScript, TypeScript, HTML and CSS.
- Creation of responsive interfaces, reusable components and pages focused on usability and visual clarity.
- Integration of frontend applications with REST APIs, Sage 50c, CRM, WooCommerce, backoffice and internal applications.
- Support for data synchronization flows including customers, products, stock, documents and commercial information.
- Support for internal and operational platforms with backoffice, PWA, authentication, tasks, agenda and mobile validation.
- Validation of builds, staging environments, routes, deployments, environment variables, publishing errors and technical documentation.

Technologies: React, Vite, JavaScript, TypeScript, REST APIs, Sage 50c, WooCommerce, C#/.NET, MongoDB, GitHub, Render, Vercel, Postman, HTML, CSS.

Full Stack Developer

1000 Farmers — March 2024

- Frontend and backend development for internal applications and the company website.
- Creation of web pages and features with PHP, Laravel, MySQL, MariaDB, HTML, CSS, JavaScript, jQuery, Bootstrap and Blade.

Technologies: PHP, Laravel, MySQL, MariaDB, HTML, CSS, JavaScript, jQuery, Bootstrap, Blade.

Frontend Developer

Bit Pagg — March 2021 to September 2021

- Development of interfaces with Angular, JavaScript and Bootstrap.
- Integration of interfaces with APIs, maintenance of existing code and support for visual and functional adjustments.

Technologies: Angular, JavaScript, Bootstrap, HTML, CSS, REST APIs.

SELECTED PROJECTS

ERP, CRM and E-commerce Integrations

Participation in technical flows integrating ERP, CRM, e-commerce and web applications, including customer, product, stock and document synchronization, data validation, error analysis, logs and process documentation.

Technologies: Sage 50c, C#/.NET, REST APIs, WooCommerce, CRM, JavaScript, Postman.

Operational Platform with Backoffice and PWA

Participation in an operational platform with backoffice and PWA, focused on internal flows, tasks, agenda, authentication, API, staging, mobile responsiveness and production readiness.

Technologies: React, Vite, TypeScript, REST APIs, MongoDB, Render, GitHub.

Catalogue and E-commerce Web Platform

Structuring of a web platform connected to a professional catalogue, e-commerce and management system, including product presentation, WooCommerce Store API preparation, responsive layout and conversion-oriented content.

Technologies: React, Vite, WooCommerce, REST APIs, Sage 50c, JavaScript, CSS.

Multilingual Personal Portfolio

Development of a personal portfolio with a custom visual identity, language-based routes, interactive visual components, a Canvas particle hero, CV downloads by language, deployment and production validation.

Technologies: React, Vite, JavaScript, TypeScript, Canvas API, CSS, GitHub, Vercel.

EDUCATION

B.Sc. in Software Engineering 2023 - 2026 In progress CET in Computer Networks and Systems — IIEP 2024 Web Programming — IIEP May 2024 - July 2024 PHP programming Python Programming — IIEP 2023 - May 2024 Frontend — Le Wagon Lisbon July 2023 Frontend and Object-Oriented Programming	Developer School November 2023 - December 2023 OutSystems Reactive Developer Fullstack Developer Bootcamp January 2021 - March 2021 JavaScript, CSS, HTML, MySQL and Postman Digital Transformation — Becas Santander March 2023 Digital transformation in companies Digital One — Becas Santander April 2023 - May 2023 Java Bootcamp PO WarmUp — Mindera Education January 2024 - February 2024 Introduction to the day-to-day work of a Product Owner

LANGUAGES

Portuguese — Native | English — B2 | French — B1

WORKING STYLE AND OBJECTIVE

Practical and problem-solving-oriented approach: breaking large problems into smaller steps, validating before assuming, testing with real data and documenting decisions to support maintenance. I am looking for opportunities as a Frontend Developer, Web Developer or Junior Software Developer, focused on React, JavaScript, TypeScript, APIs, system integration and business applications.
